## MINING PLANS

# Vanadium in Oviken could become of national interest – would affect the mining plan

1:31 min [Share](#)

Posted today at 07.48

- The vanadium deposit in Häggån in the Ovik district may become a so-called "national interest", which may affect the mining plans there.
- It is the Geological Survey of Sweden, SGU, that is now investigating the issue.

- o If the vanadine in Häggån becomes a new national interest, the Mining Inspectorate will take it into account.
